

BUSINESS CONTINUITY. AUTOMATIC FAILOVER. REVENUE PROTECTION.

WHEN PAYMENTS GO DOWN... REVENUE STOPS.

Every payment environment depends on gateway connectivity. When that fails, the impact is immediate.

- Transactions decline or time out
- Customers abandon purchases
- Staff cannot process payments
- Revenue is lost in real time

Downtime isn't an inconvenience—it's a direct hit to your bottom line.

THE HIDDEN RISK

Most payment environments rely on:

- A single gateway connection
- No automatic failover
- Manual intervention during outages

If your gateway goes down...
your business stops
accepting payments.

THE SOLUTION

Gateway Shield enables preconfigured payment continuity by allowing transaction routing to shift to an alternate processor when primary processing becomes unavailable.

Depending on the merchant environment, gateway switch logic or merchant-side configuration may be required in advance.

No manual intervention.

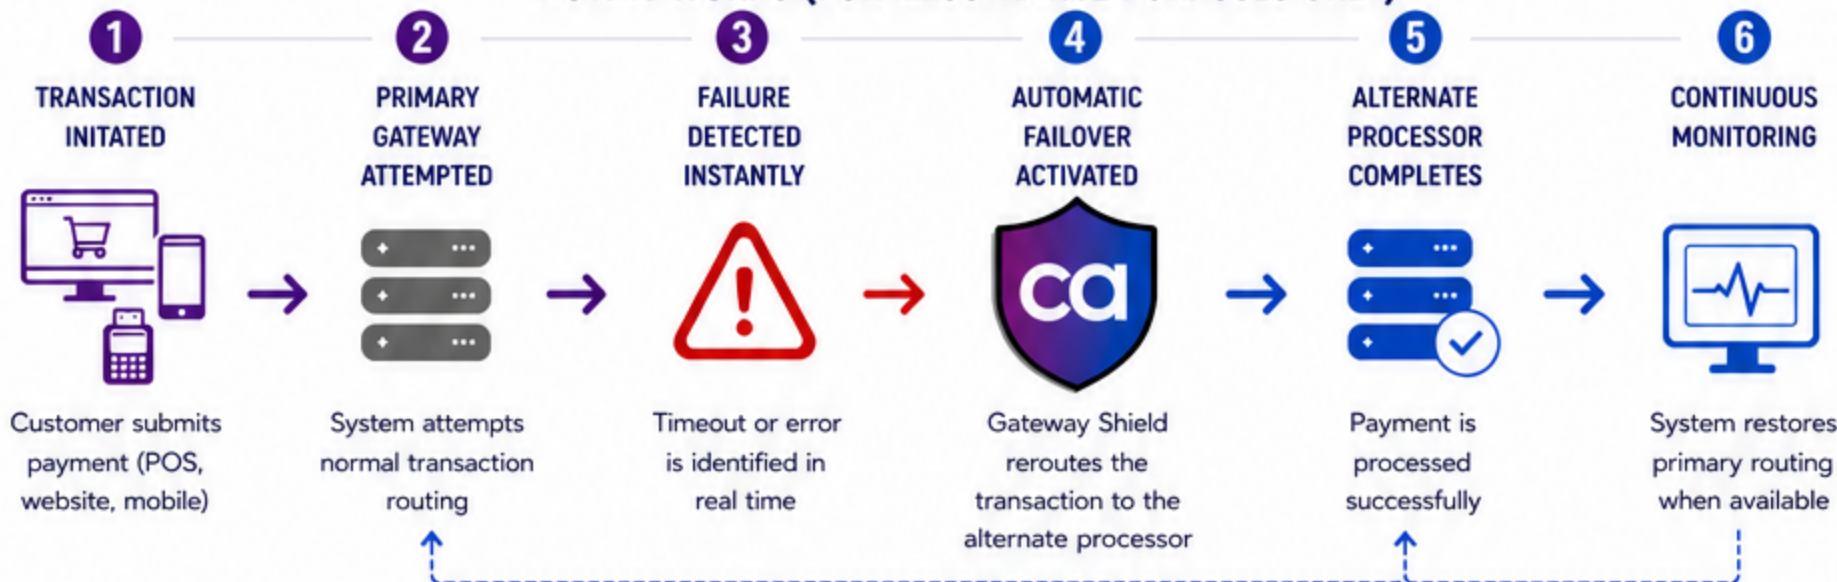

No delays.

No lost revenue.

HOW IT WORKS (FOR ILLUSTRATIVE PURPOSES ONLY)

WITHOUT GATEWAY SHIELD

Failed transactions

Lost sales

Customer frustration

Operational disruption

VS.

WITH GATEWAY SHIELD

Transactions continue seamlessly

Revenue is protected

No manual intervention required

Business stays operational

WHAT THIS MEANS FOR YOUR BUSINESS

REVENUE PROTECTION

Never lose a sale due to gateway downtime.

CONTINUOUS UPTIME

Keep payments flowing—even during outages.

OPERATIONAL STABILITY

Eliminate emergency troubleshooting and chaos.

CUSTOMER EXPERIENCE

No interruptions at checkout or point of sale.
