

Intelligent Transaction Routing

Orchestrated for Performance. Profitability. Control.

Control how every transaction is authenticated, routed, and optimized—across your entire payments ecosystem.

ComsGate Intelligent Transaction Routing orchestrates every part of the payment lifecycle, using rules, data and real time analytics to make the best decision for every transaction.

ORCHESTRATION RULES IN ACTION

1. VOLUME-BASED ROUTING

Route based on transaction volume

- Under \$100K → TSYS
- Over \$100K → Fiserv

2. DATA-DRIVEN ROUTING

Route based on transaction attributes

- High-ticket → Elavon
- Card type / currency → Optimized processor

3. FAILOVER PROTECTION

Ensure continuous processing

- Primary fails → Global Payments (backup)
- Automatic rerouting—no disruption

LOAD BALANCING

Route transactions dynamically across processors based on real-time rules, performance, and data.

COST & APPROVAL OPTIMIZATION

Increase approval rates and reduce processing costs through smarter transaction decisions.

SECURITY & RISK CONTROL

Orchestrate authentication and risk tools across every transaction—3DS, AVS, BIN management, and more.

REAL RESULTS FOR YOUR BUSINESS

INCREASE APPROVAL RATES

More approvals.
More revenue.

REDUCE PROCESSING COSTS

Lower fees.
Higher margins.

ELIMINATE SINGLE-PROCESSOR DEPENDENCY

Intelligent failover.
Always on.

ENSURE CONTINUOUS UPTIME

Built-in redundancy.
Zero disruption.

SCALE WITHOUT LIMITS

Grow your portfolio
with total control.
